Summary:

Received a call from [redacted], at Waitemata [redacted] advising that he was preparing the DHB's response to Mr [redacted]'s concerns. Noted that we had requested "all relevant notes" and wanted to check with me whether we really meant that, as Mr [redacted]'s records were extensive to the point that they would need to hire an extra employee to manage this task. Advised him that we certainly did not require this information - we needed a high level summary of his care/concerns and the clinical records necessary to support this. He thanked me and advised that their response should be ready by the due date.
